## Prerequisites

This course will be taught assuming that students have taken an intermediate microeconomics course. Furthermore, students should have a working knowledge of multivariate calculus at a minimum.

Primary Texts: G. Jehle and P. Reny, *Advanced Microeconomic Theory* (Boston: Addison-Wesley, 2011)

W. Nicholson and C. Snyder, *Microeconomic Theory* (South-Western, 11th edition)

Other popular textbooks include:

Kreps, D., *A Course in Microeconomic Theory*, (Princeton: Princeton University Press, 1990).

MasCellel, A., M. Whinston, and J. Green, *Microeconomic Theory* (New York: Oxford University Press, 1995).

Varian, H., *Microeconomic Analysis* (3rd edition) (New York: Norton, 1992).

A classic text covering consumer theory is:

Deaton, A. and J. Muellbauer, *Economics and Consumer Behavior*, Cambridge University Press, 1980.

## Mathematical Tools: Optimization and the Envelope Theorem

For those who are interested in learning some of the mathematical techniques, I recommend Fundamental Methods of Mathematical Economics by Alpha Chiang and K. Wainwright or Mathematics for Economists by Carl Simon and Lawrence Blume. Others interested in a more rigorous mathematical treatment are referred to Mathematical Optimization and Economic Theory by Michael Intriligator, Mathematical Methods and Models for Economists by Angel de la Fuente and Real Analysis with Economic

Applications by Efe Ok. A nice exercise book for game theory that I recommend is Strategy and Game Theory by Felix Munoz-Garcia and Daniel Toro-Gonzalez.

You may want to review Jehle and Reny, Appendix 1 and 2. Nicholson and Snyder, Chapters 1-3. Other reviews include Varian, Chapters 26-27 and M-W-G, Mathematical Appendix.
