Master of Science in Supply Chain Analytics

Master analytics, navigate the industry and become a data-driven leader

This is a STEM-designated degree program

Recent trends in big data and analytics are changing the way supply chains are managed across the globe. Market surveys reveal that professionals possessing both supply chain and analytics knowledge are in short supply. The Master of Science in Supply Chain Analytics (MSCA) at Rutgers Business School is a forward-looking program that addresses these emerging trends by preparing graduates who can integrate and apply analytics to generate significant value for supply chains.

Designed for working professionals looking for flexibility, this program can be completed full-time in 1 to 1.5 years or part-time in up to 4.5 years.

The program is housed in the highly ranked Department of Supply Chain Management at Rutgers Business School. It provides rigorous training, hands-on experience and industry recognized certificates (SAP, Lean Six Sigma, etc.), and affords students a competitive advantage in one of the fastest growing and best compensated job markets.

Our students have been hired by Fortune 500 companies such as Johnson & Johnson, Amazon, Accenture, Intel, Panasonic, Dell, Bayer, JB Hunt, Campbell’s and more.

Curriculum

For supply chains to run smoothly, they need savvy, data-driven decision makers who can communicate well. Our curriculum is built to help you be that person. You’ll find the ideal balance of hard analytical data skills, experiential learning and supply chain domain knowledge, as well as leadership and management opportunities with practical application. Some courses also offer you the opportunity to earn professionally-recognized certificates that will help advance your career.

“Since working in supply chain for the past 5 years, I’ve learned that analytics is the future. I chose this program because I believe it’s going to help me boost my career and become a better supply chain professional.”

– Asad Nadir,
MSCA alumni; Senior Analyst at Johnson & Johnson

Dual Degree Program

Rutgers Business School offers undergraduate Supply Chain Management (SCM) major students a chance to combine their Bachelor of Science in Supply Chain Management degree with Master of Science in Supply Chain Analytics (MSCA) graduate program, and earn both a Bachelor’s and a Master’s degree in 5 years (applications should be started prior to senior year).

Admissions

This highly competitive program is best suited for students who wish to apply analytics to the supply chain field and become future supply chain leaders. We encourage students with a diverse educational and professional experience to apply.
