Master of Science in Supply Chain Management (Online)

Advance your career in one of the fastest-growing areas of business

As supply chains continue to evolve, professionals in the industry are faced with the challenges and complexities of creating sustainable supply chains in their organizations. The need to gain expertise in the field continues to grow, but it can be difficult to manage with professional and personal obligations. The Master of Science in Supply Chain Management program is an innovative, solution-oriented 30-credit, 10 course Master’s degree program that will be instrumental in taking you to the next level in your career.

We have been recognized as the #5 Graduate Supply Chain Management Program in the United States by Gartner, 2022.

Rutgers Business School’s online Master of Science in Supply Chain Management is designed to provide supply chain management professionals with intense instruction in the latest tools, techniques and strategies that are considered “Best Practices” in the Supply Chain Management field.

Faculty Profile: Rudolf Leuschner

Professor Leuschner is the Program Director for the online Master of Science in Supply Chain Management program and an Associate Professor in the department of Supply Chain Management at Rutgers Business School. He is at the forefront of online education as the Faculty Coordinator for Distance and Online Learning and the creator of the Supply Chain Management MOOC specialization.

His research focuses on the end-to-end supply chain and the integration of its three primary flows: products, information and finances. Specifically, in the new field of Supply Chain Finance, he has been active in developing relevant insights for academic and practitioner audiences. He co-developed the Rutgers Business School Payment Practices Index which ranks retailers’ performance.

He has been a frequent speaker at academic as well as practitioner conferences. His teaching interests at the undergraduate, graduate, and executive education level are on the topics of Supply Chain Strategy, Innovation, Supply Chain Finance, and Demand Management.

Curriculum

The curriculum is adapted to address current trends in the industry, which allows the immediate benefit of using what you know in your everyday role. By building on your existing knowledge in business and supply chain management, we help you to develop the necessary skills to advance in your career. Our curriculum is based on a holistic end-to-end view of supply chain management. There are no pre-requisites, allowing you to tailor your education to your precise needs.

**Supply Chain Excellence MasterTrack Certificate**

The Supply Chain Excellence MasterTrack Certificate offered through a partnership with Coursera, will take your supply chain management knowledge and expertise from beginner to advanced! The program features live expert instruction, interactive team-based learning, and real-world projects—100% online.

The MasterTrack Certificate offers the equivalent of one masters level class through Rutgers Business School’s Master of Science in Supply Chain Management program. If you complete the MasterTrack program and are admitted to the full master’s degree program, the MasterTrack courses will count as 3 credits (or 1 class) towards your degree.

Career Outcomes

Our students are our primary focus. We strive to foster an engaging and supportive learning community, drawing on the unique experiences of each student. The success they are having in their careers speaks for itself. While enrolled in the program, current students enjoyed an almost 19% increase in base salary, and alumni already experience a 26% increase.
