Google Scholar: <https://scholar.google.com/citations?user=y2CF030AAAAJ&hl=en>

### EDUCATION

1955	B.Sc. (Mechanical Engineering), Technion-Israel Institute of Technology
1956	Diploma (Mechanical Engineering), Technion-Israel Institute of Technology
1959	M.Sc. (Operations Research/Statistics), Technion-Israel Institute of Technology
1962	Ph.D. (Engineering Science/Applied Mathematics), Northwestern University

### PROFESSIONAL EXPERIENCE

1988–present	<b>Distinguished Professor of Business</b> , Rutgers University <b>Professor II of Mathematics</b> , Rutgers University
1996	Acting Chairman, Department of Management Science and Information Systems, Rutgers University
1976–1988	H. Fletcher Brown Professor of Mathematics, University of Delaware
1976–1979	Chairman, Operations Research Program, University of Delaware
1970–1975	Professor of Applied Mathematics, Technion-Israel Institute of Technology
1973–1975	Chairman, Department of Applied Mathematics, Technion-Israel Institute of Technology
1969–1970	Professor of Engineering Science and Applied Mathematics, Northwestern University
1966–1968	Associate Professor of Engineering Science, Northwestern University
1965–1966	Associate Professor of Systems Engineering, University of Illinois at Chicago Circle
1963–1965	Senior Lecturer of Mathematics and Industrial Engineering, Technion-Israel Institute of Technology
Visiting Professor (visit longer than one month):	
University of Tampere, Tampere, Finland, 2008	
Indian Institute of Technology, Kanpur, India, April–May, 1995	
Indian Statistical Institute, New Delhi, India, January–March, 1995	
Institute of Applied Mathematics, Academia Sinica, Beijing, China, 1991	
Institutes of Informatics (Computer Sciences) and Economics, University of Bergen, Norway, 1987	
Departments of Mathematics and Economics, Bar-Ilan University, Ramat-Gan, Israel, 1986	
Department of Science and Technology, The Chr. Michelsen Institute, Bergen, Norway, 1985	
Department of Mathematics, La Trobe University, Melbourne, Australia, 1985	
National Research Institute of Mathematical Sciences, CSIR, Pretoria, South Africa, 1981	
Operations Research Program, Graduate School of Business, Tel-Aviv University, Israel, 1980–81	
Department of Industrial Engineering and Management Sciences, Northwestern University, 1975–76	
Center for Cybernetic Studies, School of Business, University of Texas at Austin, 1974	
Department of Engineering Sciences/Applied Mathematics, Northwestern University, 1972–73	
US Army Mathematics Research Center, University of Wisconsin at Madison, 1970 and 1973	
Grad. School of Business Administration, Carnegie Institute of Technology (Carnegie-Mellon University), 1962–63	

### WORTH MENTIONING

1997–present **Editor of Mathematical Inequalities & Applications**, an International Journal

1995–present **Series Editor of Computation in Education: Mathematics, Science and Engineering**, Gordon & Breach Publishers.

1995 – awarded **Fulbright Professorship** to carry out research in India.

1992 – An **International Symposium on Linear Algebra and Optimization**, honoring my contributions to these areas, held in Haifa in June, 1992. The symposium was sponsored jointly by the Technion–Israel Institute of Technology, Haifa University and the International Linear Algebra Society.

## AREAS OF CURRENT RESEARCH

## MATHEMATICS

Convexity and Inequalities. Matrix Theory.  
 Optimization Theory: Nonsmooth Analysis.  
 Symbolic Computation.

## APPLIED MATHEMATICS

Numerical Linear Algebra. Linear and Nonlinear Programming.  
 Clustering and Classification.

## STATISTICS

Stochastic Optimal Control and Dynamic Programming.  
 Mathematical Economics. Economics of Uncertainty.  
 Facilities Location. Management of Natural Resources.

ECONOMICS  
OPERATIONS RESEARCH

## STUDENTS SUPERVISED

## PH.D.

1. **Robert D. Davis**, *On the Delivery Problem and some Related Topics*, Operations Research, Northwestern University, June 1968
2. **Philip D. Robers**, *Interval Linear Programming*, Operations Research, Northwestern University, August 1968
3. **Claude Cohen**, *An Investigation of the Geometry of Subspaces for some Multivariate Statistical Models*, Industrial Engineering, University of Illinois at Urbana, June 1969
4. **Luis Pascual**, *Constrained Maximization of Posynomials and Vector-Valued Criteria in Geometric Programming*, Operations Research, Northwestern University, August 1969
5. **Robert A. Abrams**, *Nonlinear Programming in Complex Space*, Applied Mathematics, Northwestern University, June 1970
6. **Sanjo Zlobec**, *Contributions to Mathematical Programming and Generalized Inverses*, Applied Mathematics, Northwestern University, June 1970
7. **Abraham Berman**, *Linear Inequalities in Matrix Theory*, Applied Mathematics, Northwestern University, August 1970
8. **Prabha Gaiha**, *Matrix Theory over Cones in Complex Space*, Applied Mathematics, Northwestern University, August 1970
9. **Aharon Ben-Tal**, *Contributions to Geometric Programming and Generalized Convexity*, Applied Mathematics, Northwestern University, August 1973
10. **Yair Censor**, *Contributions to Optimization Theory: Multiobjective Problems*, Mathematics, Technion-Israel Institute of Technology, August 1975
11. **Michael Epelman**, *On the Structure of Convex Sets and its Applications*, Applied Mathematics, Technion-Israel Institute of Technology, August 1975
12. **William S. Lovejoy**, *Policy Bounds for Markov Decision Processes with Applications to Fisheries Management*, Operations Research/Marine Studies, University of Delaware, December 1983 (supervised jointly with Prof. Lee G. Anderson.)
13. **Sjur D. Flåm**, *Resource Management under Uncertainty*, Operations Research/ Mathematics, University of Delaware, June 1984 (supervised jointly with Prof. Lee G. Anderson.)
14. **Matthias Kramp**, *Models of Switching: Multi-Purpose Fleets in Fisheries, Multi-Armed Bandits and Gittins Indices*, Operations Research/Mathematics, University of Delaware, May 1987
15. **Malini Krishnamurti**, *Uncertainty and Duality in Economic Models and Effects of Policy on the West German Diary Industry*, Operations Research/ Mathematics, University of Delaware, May 1989 (supervised jointly with Prof. Joachim Elterich.)
16. **Xueqing Tang**, *Topics in Optimization and Combinatorics*, Operations Research, Rutgers University, May 1992
17. **Jianming Miao**, *Topics in Matrix Theory and Applications in Statistics and Approximation*, Operations Research, Rutgers University, May 1995
18. **Fuan Zhao**, *Envelope Theorem and Duality of Optimization Problems*, Operations Research, Rutgers University, September 1998
19. **Yuri Levin**, *Directional Newton Methods in n Variables*, Operations Research, Rutgers University, August 2001
20. **Cem Iyigun**, *Probabilistic Distance Clustering* Operations Research, Rutgers University, November 2007
21. **Chris Gaffney**, *Deductible Insurance and the Transfer of Risk*, September 2014

## M.Sc.

1. **Igal Adiri**, *An Application of the Pontryagin Maximum Principle to Inventory and Production Models*, Operations Research, Technion-Israel Institute of Technology, June 1965
2. **Uzi Eilam**, *On the Solution of the Assignment Problem by the Multipliers Method*, Operations Research, Technion-Israel Institute of Technology, June 1965
3. **Ronald J. Stern**, *Generalized Constrained Derivatives in Nonlinear Programming*, Operations Research, Northwestern University, January 1970

4. **Ziv Eshcoli**, *On the Kuhn-Tucker Optimality Conditions in Banach Space*, Statistics/Operations Research, Tel-Aviv University, June 1973
5. **Isaac Bussel**, *Bounds and Approximations for the Expected Value of a Convex Function of Random Variables*, Mathematics, Technion-Israel Institute of Technology, October 1974
6. **Paul Rashevsky**, *On Optimality Conditions in Banach Space*, Applied Mathematics, Technion-Israel Institute of Technology, August 1975
7. **Valerie Barnes**, *On Recruiting Functions in Fisheries Dynamics*, Applied Mathematics, University of Delaware, June 1979
8. **Gary Custis**, *Optimal Allocation of Effort in Fisheries by Using Dynamic Programming*, Applied Mathematics, University of Delaware, June 1979
9. **George Treisner**, *On Switching Models in Interdependent Fisheries*, Applied Mathematics, University of Delaware, June 1980
10. **Eileen F. Beahan**, *Interactive Multiple-Objective Programming*, Operations Research/Mathematics, University of Delaware, June 1984
11. **Malini Krishnamurti**, *The Principle of Optimality in Dynamic Programming*, Operations Research/Mathematics, University of Delaware, December 1986

#### BOOKS

1. A. Ben-Israel and T.N.E. Greville, GENERALIZED INVERSES: THEORY AND APPLICATIONS, Pure and Applied Mathematics: A Wiley-Interscience Series of Texts, Monographs and Tracts, John Wiley and Sons, New York, 1974, xi + 395 pp. ; reprinted by R.E. Krieger Publishing Co., New York, 1980 ; Chinese translation 1989
2. A. Ben-Israel, A. Ben-Tal and S. Zlobec, OPTIMALITY IN NONLINEAR PROGRAMMING: A FEASIBLE DIRECTIONS APPROACH, Pure and Applied Mathematics: A Wiley-Interscience Series of Texts, Monographs and Tracts, John Wiley and Sons, New York, 1981, ix + 162 pp.
3. W. Koepf, A. Ben-Israel and R.P. Gilbert, MATHEMATIK MIT DERIVE<sup>®</sup> (German), Vieweg-Verlag, Berlin, 1993, xiv + 394 pp. ISBN 3-528-06549-4
4. A. Ben-Israel and R.P. Gilbert, COMPUTER SUPPORTED CALCULUS: WITH MACSYMA<sup>®</sup> EXAMPLE SESSIONS, Springer Verlag, 1000 pp. ISBN 3-211-82924-5
5. A. Ben-Israel and T.N.E. Greville, GENERALIZED INVERSES: THEORY AND APPLICATIONS (2nd edition), Springer-Verlag, New York, 2003, 400 pp., ISBN 0-387-00293-6 [Link](#)

#### BOOKS IN PREPARATION

6. A. Ben-Israel and R.P. Gilbert, *Analysis with Mathematica*, CRC
7. A. Ben-Israel, *Topics in Operations Research*, Springer
8. A. Ben-Israel, *The Matrix Volume: Theory and Applications* [Link](#)
