## **Green-Energy Pushers Will Do Immense Harm to Africa**

They say they will save the planet—but for whom?

“Solar and Wind Force Poverty on Africa” (op-ed by Yoweri K. Museveni, Oct. 25)—and all under the guise of saving the planet. But saving it for whom? Several hundred million Africans live in poverty, thanks partly to a lack of reliable energy. The imposition on the Third World of green mandates, like tariffs, must inevitably hamper poor nations’ ability to produce goods and services.
