Procurement Auctions
Spring 2007
Englehard 301

Plan for the Class as of January 11

While we may have a guest lecturer or a trip to an auction, typical classes will involve a lecture and one or two short student presentations. Class preparation will involve some assigned reading and some optional reading. The student presentations will be a summary of some part of the optional reading. Over the course of the semester, each student will have chances to make such presentations. Students are encouraged to volunteer for presentations on topics of particular interest to them. In the absence of a volunteer, I will assign a non-volunteer.

There will be a mid-term, tentatively scheduled for February 28 covering material covered through February 21. Students will write a term paper on a mutually agreeable topic related to auctions. Proposals for paper topics are due March 21, but can be presented earlier. Students will discuss their papers in our last class on April 25. Class attendance is expected. There is a conference at DIMACS on the Busch Campus in Piscataway on March 22 and 23 dealing with models of auctions with transaction costs. Attendance is free for Rutgers graduate students. Students are encouraged, but not required, to attend. There will be no final exam. A student's grade will depend upon class participation including presentations, the midterm, and the term paper.

There is no text, but there is a lot of reading. I will try to supply copies to the class at least of required papers and copies of optional papers at least to volunteer presenters. I will try to see to it that copies of relevant books are made available in the library. The tentative schedule below and the tentative readings on the following pages are indeed quite tentative. The actual schedule and assignments will evolve and not be finalized until the week before the class.

Tentative Schedule for the Class

January 17	Introduction to Class and to Auctions
January 24	High Theory of Auctions
January 31	Modeling Auctions
